

Papyrus WebControl™ 7

Product Description

Papyrus WebControl offers integrated print, job, spool and queue management across all platforms and multiple output channels.

Papyrus WebControl assembles the renowned **ISIS Papyrus** document products into the most complete printer and system independent document production and distribution solution. It is based on the **Papyrus Objects** infrastructure.

Papyrus WebControl can be used on Windows, Unix, Linux and z/OS platforms, supports different printer types like IPDS, IJPDS, Xerox Metacode, Postscript and PCL and offers universal interfaces to archive systems.

Papyrus WebControl provides the following features:

- A complete network print job management solution for in-house print shops, print service or Direct Mail providers
- A single resource library with platform independent forms and fonts
- Management of the complete life cycle of a high volume production job
- Tools to view, manage and control development, customer sign-off, volume-formatting, print production, distribution and archiving through standard web browsers or **Papyrus Client** and **Papyrus Desktop**
- Server based job control and management

Job Management

- Control of not-to-print documents, which can also be distributed via CD-ROM/DVD, Fax, e-mail or the Internet
- Manage the complete life cycle of a volume production job
- Create jobs from predefined templates
- Create jobs with multiple steps e.g. DocEXEC formatting – IPDS printing – Archiving
- Job splitting for parallel processing
- Calling third party programs
- Job logging and job recovery

Spool Management

- Manual and scheduled submission of jobs (local and remote)
- Defining customized queues from templates for various jobs and spools
- User management features allow users and work groups to access selected queues and jobs on one or more servers depending on their role and privileges
- Hold output queues with a simple mouse click
- Reroute output spools to channel attached printers or network printers
- Prioritize spools for faster throughput or split big jobs in smaller units and print them in parallel on several printers
- Drag and drop job control
- Definition of job priorities, e.g. printing large jobs last
- Creation of specific job classes
- User administration and multiuser support
- Remote access to multiple servers from single operator view (**Papyrus Desktop** or browser)
- Reroute jobs to other queues
- Submit print jobs from both local and remote workstations
- Load balancing of printers
- Selection of Best Match job queues

Spool Management Options:

Define customized queues for various jobs and various spools. User management capabilities allow the user or a work group to access queues and jobs that run on a server or mainframe. Include platform queues to be shown and handled on the user panel. Prioritize spools for faster throughput. Manage and re-route any printer stream from existing JES or other spooling systems.

Print Management

- Manage print jobs on all printers with TCP/IP address from any workstation in the network
- Manage **DocEXEC** formatting jobs
- Execute PAGEDEF - Linemode jobs with the help of **PageEXEC**
- Supports the following printers: AFP to PCL, IPDS, IJPDS, Postscript, Xerox Metacode, PDF, Fax, TIFF and GIF
- Direct printing of the following formats: PCL, Postscript, Metacode, IJPDS
- 'Up and Running' operation mode for continuous feeding of all **Papyrus Server** modules

Print Management Options

Send **PageEXEC** or **DocEXEC** jobs for document formatting from your clients to **Papyrus Server** modules running on different platforms within your intranet or Internet environment.

Papyrus WebControl is built on **Papyrus Objects** written in C++, which provides the perfect tool for cross-platform IT environments.

This web-enabled technology allows you to also use your browser to access **Papyrus Server** via the Intra/Internet. **Papyrus Objects** is the infrastructural component of Papyrus Software offering object management in a workflow sense.

Prerequisites

- z/OS 2.1/2.2/2.3 or
- Windows Vista/7/8/10/Server 2008/ Server 2012/Server 2016 or
- AIX 6.1/7.1 or
- HP-UX Itanium 11.31 or
- Solaris V10/V11 or
- Linux (SLES 11/12, RHEL 5/6/7)
- TCP/IP
- Printing through a Windows printer driver can be done on any standard network printer

Order Information

Papyrus WebControl™ 7 for z/OS Unix, z/Linux, HP-UX Itanium, AIX, Solaris, Linux or Windows

Training

ISIS Papyrus offers customized in-house workshops as well as standard courses for user training.

Maintenance

The General Terms and Conditions for Papyrus Software Products apply. The free service period is 6 months from installation. After this period an optional maintenance contract is offered.
